Full-stack developer focused on Java/Spring Boot and React. Since 2026 I have been building LifeQR on my own – a SaaS platform of 7 microservices with its own CI/CD pipeline, running on a Linux server. Degree in software engineering, recognised by the German Chamber of Commerce (IHK) as equivalent to Fachinformatiker / Application Development.

Looking for: Java or full-stack developer role (junior/mid) – remote or in Regensburg.

SKILLS

Backend	Java 21 · Spring Boot 3 · Spring Security · JWT · REST · JPA / Hibernate · JUnit 5 · Mockito
Frontend	React 19 · TypeScript · JavaScript (ES2023) · Vite · TanStack Query · React Router · HTML5 / CSS3 · Vitest
Data	PostgreSQL · Liquibase · MinIO (S3)
DevOps	Docker · Docker Compose · GitHub Actions · Linux · nginx · Let's Encrypt
Architecture	Microservices · Transactional Outbox · Clean Code · SOLID

PROJECTS

LifeQR – SaaS platform for digital family memory 01/2026 – present
In development · test environment · lifeqr.kz

- 7 Spring Boot microservices (auth, family, memorial, media, chat, notify, billing), each with its own PostgreSQL database and Liquibase migrations
- Security: Spring Security (deny by default), JWT with refresh-token rotation, rate limiting, internal endpoints protected by a shared secret
- Reliable events between services using the transactional outbox pattern (PostgreSQL, retries)
- Frontend: React 19, Vite, TanStack Query, PWA, 5 languages (i18n), gradual migration to TypeScript
- Operations: Docker Compose on a Linux VPS, nginx with TLS, media in MinIO; CI/CD with GitHub Actions per service incl. health checks
- Unit tests with JUnit 5, Mockito and Vitest

Pixora A. Studio – In-browser graphics editor 10/2025 – present
Layers, drawing tools, undo/redo, transformations and PNG export – no frameworks. (JavaScript, Canvas API, HTML5, CSS3)

RODNIK – Marketplace for farmers 2025
Marketplace connecting farms directly with customers: roles, farm and product management, orders, file service. (Java 21, Spring Boot 3, React, MinIO)

Learning projects – JavaScript, DOM, SVG, Canvas 2025 – 2026
Forms with validation, SVG clock, canvas games, drag & drop, AJAX – exercises from the IT-Academy courses. (JavaScript, SVG, Canvas API)

EXPERIENCE

Self-employed software developer – PERUNIX, Regensburg 02/2025 – present

- Design, development and operation of my own SaaS platform LifeQR (backend, frontend, DevOps)
- Company website perunix-web.de for web services

Paintless dent repair technician (hail damage) 2012 – 2020

- Paintless repair of hail and dent damage – precise manual work under time pressure

SMT specialist – Zollner Elektronik AG 05/2006 – 04/2012

- Programming, commissioning and maintenance of automated production lines (Siplace, AOI)

Managing director – EVA Plus GmbH, Almaty 02/1999 – 08/2003

- Sales and service of computer hardware, network installation, leading a small team

EDUCATION
